

A Million-fold Increase in C-H Bond Acidity Gives Palladium a Key Advantage in C(sp³)-H Activation Compared to Nickel

Title: A Million-fold Increase in C-H Bond Acidity Gives Palladium a Key Advantage in C(sp³)-H Activation Compared to Nickel

Primary author(s) : Mr. SCHRAMM, Tim K. (University of Bonn)

Co-author(s) : Ms. LIN, Lirong (Department of Chemistry, Rutgers University); Mr. KUCHERYAVY, Pavel (Department of Chemistry, Rutgers University); Mr. LALANCETTE, Roger A. (Department of Chemistry, Rutgers University); Mr. HANSEN, Andreas (University of Bonn); Mr. PRKOPCHUK, Demyan (Department of Chemistry, Rutgers University)

Presenter(s) : Mr. SCHRAMM, Tim K. (University of Bonn)
