PhD program in Quantum Technologies 2022 Summer School

Tuesday 30 August 2022

Students Talks 2 (18:00-20:00)

time	[id] title	presenter
18:00	[95] Digital qubit readout with a flux-switchable superconducting circuit	DI PALMA, LUIGI
18:20	[104] Harmonic generation in SNAIL TWPA	LEVOCHKINA, ANNA
18:35	[117] Interfacing superconducting digital read-out circuit for optimal control	Dr. MASTROVITO, Pasquale
18:50	[105] Self-induced Josephson junction in a supersolid dipolar quantum gas	Ms. DONELLI, Beatrice
19:05	[106] Distributed Quantum Sensing for optical and atom interferometry	Mr. MALITESTA, Marco
19:20	[111] A new experimental apparatus for trapping ytterbium atoms in optical tweezer arrays	ABDEL KARIM, Omar
19:35	[114] Single Molecules in Integrated Optical Cavities and Waveguides	Mr. EMADI, Ramin
