PhD program in Quantum Technologies 2022 Summer School

Friday 02 September 2022

Students Talks 3 (18:00-20:00)

time	[id] title	presenter
18:00	[109] Fabrication and characterization of magnetic Josephson Junction towards quantum circuits	Dr. SATARIANO, Roberta
18:20	[108] Ferro-Transmon Qubit: prospective and feasibility	Dr. FERRAIUOLO, Raffaella
18:35	[116] Molecular Photons based Quantum Key Distribution at Room Temperature	Mr. MURTAZA, Ghulam
18:55	[89] (Causal)-Activation of Complex Entanglement Structures in Quantum Networks	Mr. KOUDIA, Seid
19:10	[103] On the Implementation of Fuzzy Inference Engines on Quantum Computers	Mr. SCHIATTARELLA, Roberto
19:25	[107] Deep learning density functionals for gradient descent optimization	COSTA, Emanuele
19:40	[115] Dissipative stabilization of entangled qubit pairs in quantum arrays	ANGELETTI, JACOPO
