The restless nature of AGN: 10 years later

Tuesday 27 June 2023

UV/Optical/IR Continuum variability: part I - Aula Magna (15:00-16:30)

-Conveners: **Matthew Graham**

time	[id] title	presenter
15:00	[165] Review: AGN Optical/UV Variability: pleasures and pains	Dr. DE CICCIO, Demetra
15:30	[127] Ensemble Power Spectral Density of AGN in optical bands	PETRECCA, Vincenzo
15:45	[12] Uncovering Optical Quasar Variability After 20 Years	STONE, Zachary
16:00	[16] Extracting AGN variable component properties with long-term optical photometry	WINKLER, Hartmut
16:15	[156] Studying Quasar accretion discs with massive optical variability surveys	Prof. ARÉVALO, Patricia

UV/Optical/IR Continuum variability: part II - Aula Magna (17:00-18:30)

-Conveners: **William Brandt**

time	[id] title	presenter
17:00	[40] Review: Optical Variability of AGN with SF and PSD	KOZLOWSKI, Szymon
17:30	[69] A Decade of Near-Infrared Variability in NGC4388: Insights into the AGN Structure	DAHMER HAHN, Luis Gabriel
17:45	[71] Revealing Changing-Look Quasar Candidates in SDSS Stripe 82 with SDSS, Pan-STARRS1, and ZTF data.	SUBERLAK, Krzysztof
18:00	[112] ZTF constraints on variability from intermediate-mass black hole candidates	CAMACHO, Ernesto
18:15	[136] Periodic variability of Stripe 82 quasar light curves	PALAVERSA, Lovro
